## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claim 5 is allowed.

The following is an examiner's statement of reasons for allowance:

The cited prior art does not disclose nor suggest third transducer means for measuring the fluid pressure by characterizing the effects that the fluid molecules produce on the motion of the structure by converting the capacitance across the first and second electrodes into frequency by including it in a tank circuit of an electronic oscillator.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. US patents 4823230, 3948102,

5034848 all teach patent sensing structures containing multiple transducers and/or electrodes.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Andre J. Allen whose telephone number is 571-272-2174. The examiner can normally be reached on mon-fri 8:00-4:30.
